Single: Transmittance for a single film

Parallel: Transmittance for a double film, axes parallel

Crossed: Transmittance for a double film, axes crossed

Vikuiti® Polarizer: HN22\*

Type: Grey-green linear polarizer

Features : For the visible spectrum and also for a portion of the near-infrared region. It offers a very high extinction value of approximately 0.0009%.

Typical applications : Microscopes, sextants and optical instruments where extreme extinction density is required.
